The present report confirms the LiG-15s are stationed at Peenemuende airfield which is occupied by a naval air force regiment. The arrival of crated LiG-15s was observed on 12 June 1952. The pilots have probably progressed so far that they now are able to conduct intensive firing at towed air sleeves. . The LiC-15s are parked on the site where the 25X1 destroyed hangars were formerly located. (2) The information that the soldiers and officers returned from furlough may be due to the fact that the fall maneuvers are usually held in September. According to available information, a total of 26 AA guns of undetermined calibers are parked in the Karlshagen depot. It is believed that a portion of these muns is employed for A/ protection of the installations at the sirfield, (4)VF recreation homes are located in the Keringsdorf-Ahlbeck area. The supply points for the units stationed at Feenemuende airfield are located
